# Who's Marmo

## Fernando Marmolejo

I had never been interested in photography but everything change in 2008 when I start to see the result for first time on a screen. I've been riding 17 years in MTB and BMX and that was my beginning into the photography. All over the years I've been traveling more and more and I decided in 2017 being a full time Photographer. Now I am proudly supported by Olympus, Cromalite, Elinchrom and Angelbird.

In 2017 I created "POINT OF SHOOTER", a personal point of view behind the scenes from my sessions. Using a 360 camera I catch everything around me when I'm working and after the shot you can see the final result on the video.

## Mountain Bike

Mountain bike and 2 wheels sports are my passion and I use to shoot this most of the time in so many countries like the Fest Series in South Africa, Belgium or France. I been working too in China, Perú, Morocco or all over Europe for many bike brands and turism agencies.
